

# 5ELR Aluminium Cylinders

## Product offering

The 5ELR is a globally approved aluminium cylinder. The 625 litres nominal gas capacity means the cylinder is ideal when larger volumes of gas are required. The cylinder can be supplied with a range of CGA valves designed to meet your specific needs. The cylinder can be filled with non-reactive gases.

| Characteristic |            |                       |                                             |                           |
|----------------|------------|-----------------------|---------------------------------------------|---------------------------|
|                | Contents   | Service Pressure      | Dimensions                                  | Weight<br>(full pressure) |
| 5E             | 625 liters | 139 bar<br>(2016 psi) | 734 mm x 111 mm<br>(w/valve) (28.9" x 4.4") | 3.95 kg<br>(8.7 lb)       |
