

JCM-300 Peltier Sample Gas Coolers

APPLICATION

- For extractive gas analysis
- For emission and process monitoring
- Continuous drying of sample gas to a precise low and constant outlet dew point
- Minimises water vapour cross sensitivities and volumetric errors

BENEFITS

- Very powerful compact complete unit with condensate removal and condensate monitoring
- High flow rates of up to 250 NI/h per gas path
- Very low wash out ratios even at high water vapour concentrations in the sample gas
- High inlet dew points up to 80°C possible
- Reliable condensate separation even at very high ambient temperatures up to 50°C
- Extremely precise long term stable dew point even under varying loads
- Maximum operational safety
- Low maintenance operation
- Easy to maintain design

FEATURES

- New extremely powerful modular designed compact construction with one or two independent gas paths
- New heat exchanger construction in different materials
- Intelligent digital control electronic
- Digital temperature indication
- Applicable up to an ambient temperature of 50°C
- Integrated condensate pump as option
- Integrated condensate monitoring as option
- Status contact for temperature thresholds as well as for condensate alarm
- Visual alerting via LED's and digital display
- Self monitoring with deactivation of the external sample pump in case of alarm
- Ready for operation within less than 15 minutes

TECHNICAL DATA

Model	JCM-310	JCM-312	JCM-320 / 321	JCM-322 / 323
Description of sample gas cooler	standard	high-performance	standard	high-performance
Cooling principle	peltier cooling			
Number of gas paths	1		2	
Number of peltier elements per active gas paths	1	2	1	2
Integrated condensate pump (option)	1		1 or 2	
Integrated condensate monitoring (option)	no		1 or 2	
Digital temperature indication (option)	no		1 or 2	

Operation

Gas flow per gas path*	max. 250 NI/hr		max. 250 NI/hr	
Gas inlet temperature*	max. 140°C			
Gas inlet dew point*	max. 80°C			
Gas outlet dew point	+5°C (factory default); adjustable from +0,5°C....+7,5°C			
Dew point stability (for constant inlet conditions)	±0,1K			
Ambient temperature	+5....+40°C	+5....+50°C	+5....+40°C	+5....+50°C
Cooling capacity total	max. 15 W	max. 30 W	max. 30 W	max. 60 W
Operating pressure with condensate pump	0,2...2,2 bara			
Max. operating pressure without condensate pump	4,0 bara			
Ready for operation	<15 min			
Pressure drop at max. flow rate	3 mbar			

Construction

Dimensions over all (W x H x D)	289 x 308 x 140 mm		390 x 348 x 212 mm	
Installation	wall mounting			
Mounting position	horizontal			
Weight**	approx. 9,3 kg		approx. 13,3 kg	
Housing, colour	stainless steel, natural			
Gas wetted materials	aluminium coated, PVDF, 1.4571, FFKM, glass			
Dead volume per gas path	67 ml			
Connection sample gas and condensate outlet with condensate pump	PVDF-hose fitting DN 4/6			
Condensate outlet without condensate pump	1/4"NPTf or 3/8"NPTf			
Approvals / signs	CE			

Electrics

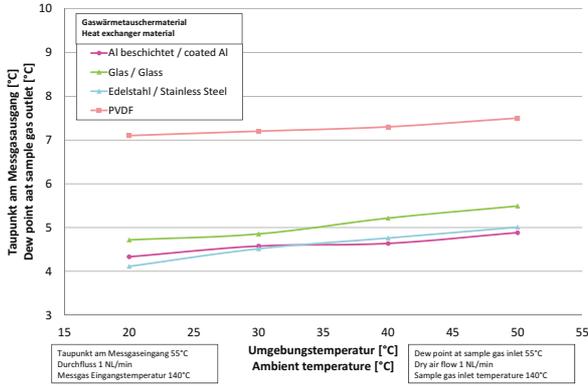

Power supply	230 VAC 50/60 Hz +/- 10% or 115 VAC 50/60 Hz +/- 10%			
Power consumption (depending on load and ambient temperature)	30....160 VA		60....320 VA	
Connection power	2 x cable conduit M12		plug CEE 7/7 to IEC plug, 2,0 m cable	
Protection class (in default mounting position)	IP 54 (EN 60529)		IP 20 (EN 60529)	
Fusing	lead fuse T2A			
On time	100 %			
Diagnostic- / operation indicator	1 x bicolour-LED		1....4 x bicolour-LED**	
Status threshold	<0 / >+10°C			
Status delay	0,5 s			
Status relay	volt free contact, 230 VAC / 2 A, min. 5 VADC / 5 mA			
Connection terminals / clamping range	spring type terminals 0,5 mm ²2,5 mm ²			
Threshold condensate detector	-		factory setting 12 kΩ adjustable 2....30 kΩ	

* Results from the effective cooling capacity at 20°C ambient temperature and 5°C outlet dew point and can be influenced by further operational parameters

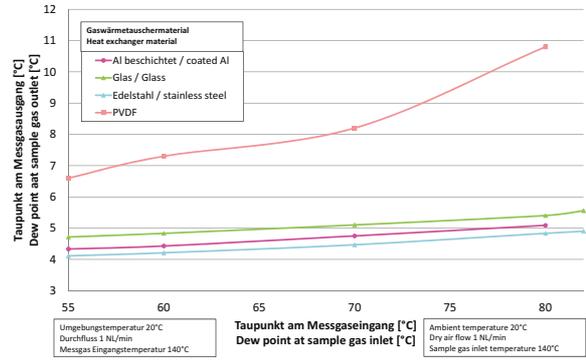

** Dependent on configuration
